**Question: 1**

---

You would like to upgrade Update Manager and keep your current database.  
What will allow you to meet this requirement?

- A. Upgrade the Update Manager plug-in prior to upgrading the Update Manager Server.
- B. During the upgrade process, a backup of the Update Manager database will be taken automatically.
- C. Within the Update Manager plug-in, backup the existing Update Manager database.
- D. During the upgrade process, make a backup of the existing Update Manager database.

---

**Answer: D**

---

---

**Question: 2**

---

In which document would you find information regarding issues encountered with software revisions?

- A. VCE Vblock Administration Guide
- B. VCE Release Certification Matrix
- C. VCE Release Notes
- D. VCE Logical Build Guide

---

**Answer: C**

---

---

**Question: 3**

---

Which two statements are true regarding VMWare Update Manager? (Choose two)

- A. Update Manager contains, by default, multiple default baselines.
- B. After installing the Update Manager plug-in, you need to immediately create baselines and baseline groups.
- C. Update Manager can only upgrade virtual machines.
- D. Baselines and baseline groups can be created to upgrade hosts, virtual machines, and virtual appliances.

---

**Answer: A,D**

---

---

**Question: 4**

---

You are asked to setup several ESXi hosts so that they boot from SAN. After completing the second host and powering it on, the ESXi image becomes corrupt.  
What is the cause?

- A. The shared LUN is out of space.

- B. A path to storage was lost.
- C. A port on the Cisco MDS switch was improperly configured.
- D. The two hosts were configured to share the same boot LUN.

---

**Answer: D**

---

---

**Question: 5**

---

You are asked to upgrade the version of the Cisco Nexus 1000V software on the Vblock System 320. Which component are you upgrading on the hypervisor?

- A. Service Console
- B. Virtual Supervisor Module (VSM)
- C. Virtual Ethernet Module (VEM)
- D. Virtual Network Interface Card (vNIC)

---

**Answer: C**

---

---

**Question: 6**

---

What is the proper sequence when upgrading the Cisco Nexus 1000V switch module?

- A. 1. Upload new VEM code to bootflash.  
Install new Cisco Nexus 1000V bin.  
Verify the upgrade using the show install all status command.
- B. 1. Upload new VSM code to bootflash.  
Install new Cisco Nexus 1000V bin.  
Verify the upgrade using the show version command.
- C. 1. Upload the new VSM code to a USB drive.  
Install new Cisco Nexus 1000V bin.  
Verify the upgrade using the show install all status command.
- D. 1. Upload the new VEM code to a USB drive.  
Install a new Cisco Nexus 1000V bin.  
Verify the upgrade using the show version command.

---

**Answer: A**

---

---

**Question: 7**

---

Your client requires RADIUS authentication to protect access to vSphere networking. Which switch type would you use?

- A. vSphere standard switch

- B. vSphere distributed switch
- C. Cisco Nexus 2224
- D. Cisco Nexus 1000V

---

**Answer: D**

---

---

**Question: 8**

---

Which steps should be performed to install PowerPathVE updates to the ESXi host through VMware Update Manager (VUM)?

- A. Enter maintenance mode, import patches, create the baseline, attach the baseline, and remediate host.
- B. Disconnect the ESXi host, import patches, create the baseline, attach the baseline, and remediate host.
- C. Import patches, create the baseline, attach the baseline, and install updates.
- D. Import patches, reboot the ESXi host, create the baseline, attach the baseline, and remediate host.

---

**Answer: A**

---

---

**Question: 9**

---

You upgrade an ESXi 4.x host to an ESXi 5.x host using VMware Update Manager. It appears to complete the installation, but the system does not boot. You decide to roll back the host to the previous build. After using the Shift-R option on boot up, you receive the error "No alternative hypervisor to roll back to".

What is causing this error?

- A. The hardware is not supported with the ESXi 5.x.
- B. The ISO file in the baseline is corrupt.
- C. The data store containing the operating system has become corrupt.
- D. There are differences in the boot loaders between the two versions.

---

**Answer: D**

---

---

**Question: 10**

---

According to the VCE Vblock System Upgrade Guide for vSphere 5.1, which two steps would be taken when upgrading vCenter to 5.1? (Choose two.)

- A. Upgrade the host to ESXi 5.1.
- B. Make a full backup of the vCenter Server database on the AMP.
- C. Make a full backup of the vCenter Inventory Service database on the AMP.
- D. Install Microsoft SQL 2008 SP3 on the Single Sign-On (SSO) virtual machine.

---

**Answer: B,D**
