Question: 1

You are configuring a SIP trunk with ID333949146 on Cisco Unified Communications Manager to direct calls towards the Cisco VCS C/E. Which two check boxes should you enable in the security profile for the SIP trunk?

- A. Transmit Security Status
- B. Enable Application Level Authorization
- C. Accept Out-of-Dialog REFER
- D. Accept Replaces Header
- E. Accept Unsolicited Notification
- F. Accept Presence Subscription

Answer: D, E

Question: 2

Which two options are dial-plan challenges in a multisite Cisco Unified Communication Manager deployment?

- A. use of same length directory numbers all over the network
- B. use of +E164 directory numbers and extensions for phones and services
- C. telephony service provider requirements on number format and types
- D. use of MGCP gateways instead of SIP trunks
- E. use of same DID numbers in multiple sites

Answer: A, E

Question: 3

Which protocol can you use to create a trunk between Cisco Unified Communication Manager and Cisco VCS?

- A. H.323
- B. SIP, H.323
- C. ILS
- D. SIP

Answer: D

Question: 4

What is the maximum allowed round-trip between Cisco Unified Communication Manager nodes?

- A. 150 ms
- B. 40 ms
- C. 500 ms
- D. 80 ms

Answer: D

Question: 5

Which DSCP service parameter can be configured for Cisco TS endpoints and Cisco Communication Manager Endpoints?

- A. DSCP for audio portion of Cisco Tele Presence calls
- B. DSCP for audio calls
- C. DSCP for video calls
- D. DSCP for audio portion of video calls

Answer: D

Question: 6

Which two gateways or trunks are considered to be call-agent controlled?

- A. SIP trunk registered to a SIP proxy server
- B. H.323 gateway
- C. H.225 trunk (gatekeeper controlled)
- D. Skinny Client Control Protocol gateway
- E. Media Gateway Control Protocol gateway

Answer: C, E

Question: 7

An engineer opens up a TAC case and wants to implement CCD/SAF service. Which menu navigation sequence must an engineer navigate to when configuring a hosted DN pattern?

- A. Call Routing > Call Control Discovery > Hosted DN Pattern
- B. Advanced Features > SAF > Hosted DN Pattern
- C. Call Routing > SAF > Hosted DN Pattern
- D. Advanced Features > Call Control Discovery > Hosted DN Pattern

Answer: A

Question: 8

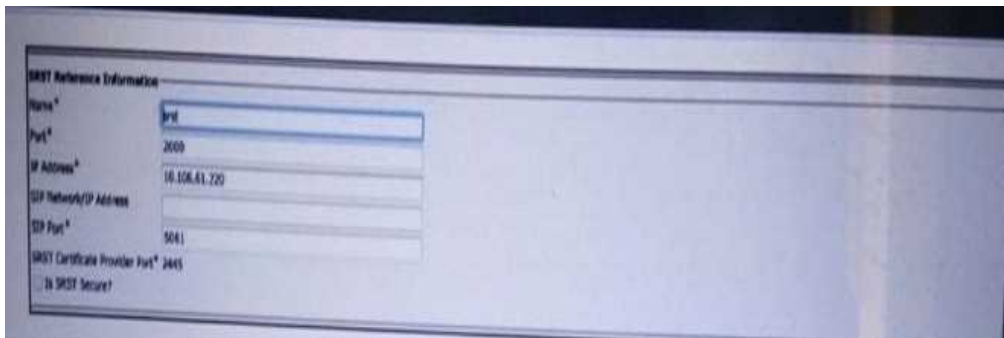

Which two options are dial plan elements that Global Dial Plan Replication allows independent clusters to share with each other using the Intercluster Lookup service?

- A. enterprise alternate numbers
- B. voicemail profiles
- C. +W.164 alternate numbers
- D. external phone number masks
- E. actual directory numbers

Answer: B, D

Question: 9

Refer to the exhibit.

Why are Cisco Unified IP Phones 9971 and 8961 not registering to the SRST gateway?

- A. The SRST reference is not configured on the phone device page.
- B. The SIP network or IP address is not provided.
- C. The SIP port is configured incorrectly in the reference.
- D. Cisco Unified IP Phones 9971 and 8961 do not work in SRST.

Answer: C

Question: 10

Which two results occur in SRST mode if the pickup commands is configured under the call manager fallback section of a router?

- A. The GPickUp soft key in on all SRST phones.
- B. The PickUp soft key is on all SRST phones.
- C. Calls ringing an unassigned directory number are forwarded to the auto attendant
- D. Calls coming into one directory number can be picked up from another directory number
- E. Calls coming into a Cisco Unified Communications Manager registered phone can be picked up by a SRST phone.

Answer: B, E

Question: 11

The network administrator has been investigating bandwidth issues between the central office and remote sites where location-based CAC is implemented. What does the Cisco Unified Communication Manager “Location Out Resources” counter indicate?

- A. This counter represents the total number of times that a call through a location on a particular Cisco Unified Communications Manager failed due to lack of bandwidth.
- B. This counter represents the total number of failed video stream requests (most likely due to lack of bandwidth) in the location where the person who initiated the video conference resides.
- C. This counter represents the total number of times since the last restart of the Cisco IP Voice Streaming Application that a Cisco Unified Communications Manager connection was lost.
- D. This counter represents the total number of times that a call through locations failed due to the lack of bandwidth.

Answer: D

Question: 12

Where are DSCP values applied to video traffic?

- A. DSCP can be set only on the video endpoint itself to ensure that the correct value is sent
- B. DSCP is configured under service parameters in Cisco Unified Communications Manager and in the Expressways
- C. DSCP can be configured only in the network with QoS policies
- D. The endpoint overrides the DSCP values configured anywhere else
- E. DSCP is configured in the device configuration section of Cisco Unified Communications Manager and in the Expressways

Answer: C

Question: 13

Which two roaming sensitive setting in the device pool configuration window override the device level settings when the device roams within or outside a of device mobility group?
Choose two

- A. MRGL
- B. codec
- C. device pool
- D. network locale
- E. extension

Answer: A, D

Question: 14

Which two statements about Cisco Unified Mobility are true? (Choose two.)

- A. Mobile use of Cisco Jabber requires mobility
- B. Single number reach is a feature of mobility
- C. Mobility is enabled by default
- D. Mobility is used to support mobile phones in Cisco Unified Communications
- E. Mobility just be enabled per user

Answer: B, E

Question: 15

Which option is indicated by SDP content in an SIP INVITE?

- A. Fast start
- B. early media
- C. early offer
- D. does not indicate anything

Answer: C
